IST-Ship link system has been designed to serve shipping agencies of global shipping lines in the Middle East and the Gulf area, as the system handles import and export B/Ls and follow-up the movement of containers and issue customers invoices.

The system includes the following:

- EDI & XML.
- Import manifest and arrival notification.
- Shipping orders and Export B/L.
- Billing & invoicing and delivery order.
- Container Control and loading & discharge lists.
- Disbursement Account.

## EDI & XML

The system allows the exchange of import and export manifest with the shipping line or with other shipping agents; the system also provides the ability to send the manifest of customs authority. Also, the user can electronically receive the gate in /out movements to be uploaded into the system database.

The system deals with most types of international messages like:

UN-EDIFACT, XML, ANSI X12 and Flat Files

## Disbursement Accounts

Based on the contract signed with the shipping line; the system sums the freight and demurrage collected for the favour of shipping line and calculates the commission (whether import or export) and records the remittances between the agent and the shipping line and issues debit/credit notes, and finally the system issues monthly statement of account for the shipping line.
